Content Engineer

Join us… we are a culturally diverse global company looking for a **content Engineer** who would be involved in a multitude of content related activities covering the overall lifecycle of Testing and approving products that would be loaded to a WAP portal. The Content Manager mainly works with Content Providers and with the Content Management System.

Glimpse of Responsibilities and Abilities

• Work with the Content Team and Customers to deliver content to the mobile WAP portal..

• Categorize, test, stage, publish and archive content properly in the Content Management System.

• Support content providers with the uploading of content items.

• Support execution of seasonal editorials, promotions, features and specials.

• Create, support and execute a full testing lifecycle of all content types.

Preferences

- Experienced in dealing with large scale commerce sites
- Know-how in digital entertainment and mobile/web-based technologies.
- Strong interpersonal and communication skills, team player.
- Ability to work in tight schedules while managing and coordinating multiple subprojects in a fast-paced environment.
- Experience with Content Management Systems and online or mobile publishing.

Requirements

• College or technical degree
• Basic knowledge downloading and using mobile content
• Experience in a testing environment
• Good knowledge in Spanish and English
• Knowledge in HTML & XML, MS Office
